

Industrial Gate Valve for Fluid Control

Industrial gate valve designed for on/off control of fluids in pipelines. Features a robust construction with flanged connections for secure installation.

Product Overview

Industrial Gate Valve for Fluid Control

This industrial gate valve is engineered for precise on/off control of fluids in demanding pipeline environments. Featuring a robust construction with secure flanged connections, it ensures reliability and safety in various industrial fluid management systems. Its design is optimized for high-performance flow regulation where durability is a priority.

Technical Specifications

Pressure Rating

150 psi

Class Rating

Valve Type	Gate Valve
Connection Type	Flanged
Applications	Fluid Control, Pipeline Systems, Industrial Flow Regulation
