

Industrial Gate Valve for Fluid Control

This industrial gate valve is engineered for precise fluid flow control. It features a durable cast iron body, flanged connections, and a manually operated handwheel.

Product Overview

Industrial Fluid Control Solution

This industrial gate valve is engineered for reliable fluid flow control in demanding environments. Featuring a robust cast iron body and secure flanged connections, it ensures durability and leak-free operation. The manually operated red handwheel allows for precise on/off adjustments, making it an ideal choice for diverse industrial piping systems.

Technical Specifications

Handwheel Color

Red

Body Material

Cast Iron

Connection Type

Flanged

Operation Mechanism

Manual Handwheel

Application

Fluid Control, Industrial Piping, On/Off Control
