

Industrial Gear and Transmission Display

This display features various gears and a transmission component. The gears are encased in a wooden box with a sliding glass lid, while a separate transmission component is positioned outside the box.

Product Overview

Industrial Gear and Transmission Display Set

This professional-grade display set features a high-quality wooden presentation box designed to showcase industrial gear components. With a sliding lid and integrated glass panels, it provides a clear, protected view of the internal transmission mechanisms, making it ideal for educational demonstrations, showroom displays, or precision engineering showcases. The set includes a separate transmission component to highlight detailed construction and mechanical assembly.

Technical Specifications

Display Features

- Sliding lid mechanism
- Integrated glass viewing panels
- Modular component arrangement

Primary Usage

Educational • Showroom Display • Engineering Demonstration

Component Type

Industrial Gears, Transmission System, Mechanical Assembly

Case Material

Wood
