

Industrial Gearbox for Power Transmission

This gearbox is designed for efficient power transmission in machinery and industrial applications. It features a robust construction with precision-machined gears and a durable housing.

Overview

Industrial Gearbox for Power Transmission

This high-quality gearbox is engineered for efficient power transmission and reliable performance in various industrial machinery applications. Featuring robust construction with precision-machined gears and durable housing, it is designed to withstand demanding operating conditions. It provides smooth, consistent operation for equipment requiring precise speed reduction and power management.

Technical Specifications

Speed Reduction Ratio	5 :1
Inner Gear Modulus	1M
Wave Wheel Spline Size	1M×45R×10Z
Suitable Load Weight	7 KG
