

Industrial Gearbox MA125

This gearbox is a robust and efficient power transmission unit designed for demanding industrial applications. It is equipped with an integrated lubrication system to ensure optimal performance and extended service life.

Overview

Industrial Gearbox MA125

The MA125 gearbox is a robust and efficient power transmission unit designed for demanding industrial applications. Featuring a rugged cast iron housing, it ensures durability and stability under heavy loads. Precision-engineered gears provide smooth and reliable operation, minimizing noise and vibration. This unit is ideal for use in a wide range of machinery, including conveyors, pumps, and mixers.

Construction & Design

Housing Material	Cast Iron
Installation Features	Multiple mounting points, Versatile installation

Performance

Operational Benefits

- Smooth operation
- Reliable performance
- Minimized noise
- Minimized vibration

Lubrication System	Yes
--------------------	-----

Applications

Suitable Machinery

Conveyors • Pumps • Mixers
