

Industrial Gearbox

Gearbox designed for machinery and industrial applications. It features durable construction for reliable power transmission and efficient operation.

Product Overview

Industrial Precision Gearbox

This high-performance industrial gearbox is engineered for reliable power transmission and efficient operation in demanding machinery environments. Designed with a 1:5 speed reduction scale, it provides optimal torque and speed control for precise equipment movement. Its robust construction ensures durability, making it a suitable choice for various industrial systems requiring consistent performance.

Technical Specifications

Speed Reduction Scale	1:5
Wave Wheel Spline Size	9x9x12
Inner Gear Modulus	0.9M

Application Data

Suitable Load Weight

7 KG

Suitable Load Weight
