

Industrial Globe Valve, GOST Standard, Flanged Connection

This industrial globe valve is designed according to GOST standards and features a flanged connection. It is constructed from durable materials to withstand high pressure and temperature environments.

Product Overview

Industrial Globe Valve Performance

This industrial globe valve is manufactured in strict accordance with GOST standards, ensuring compatibility with Russian industrial requirements. It features a robust flanged connection design tailored for reliable fluid control in demanding environments. Built for durability, the valve is engineered to withstand significant pressure and temperature variations, offering long-term operational stability with minimal maintenance requirements.

Technical Specifications

Design Standard
GOST Standard

Valve Type | Globe Valve

Size Range | 25-200

Connection Type | Flanged
