

# Industrial Grinding Machine for Abrasive Applications

This industrial grinding machine is designed for precision abrasive and grinding applications. It features a robust frame ensuring durability and stability during operation, along with a control panel for precise adjustments and safety features.

## Overview

### Industrial Precision Grinding

This industrial grinding machine is engineered for high-precision abrasive and grinding applications in demanding metalworking environments. It features a robust, stable frame designed to maintain accuracy during heavy-duty operation. The unit is fully equipped with an intuitive control panel for precise adjustments and essential safety mechanisms, including a key-operated power switch.

## Technical Specifications

Model Number	SJ22-300B
Primary Application	Industrial Grinding, Abrasive Processing, Metalworking

## Design & Safety

### Safety Features

- Key-operated power switch
- Integrated warning labels
- Robust frame construction

### Finish

Red • White
