

Industrial Grinding Wheel

This industrial grinding wheel is designed for effective material removal. Its segmented construction is suitable for cutting, grinding, and polishing applications across various industries.

Product Overview

Industrial Grinding Wheel

This industrial grinding wheel is engineered for high-performance material removal and surface finishing applications. Designed with a segmented structure, it offers optimized cutting efficiency and durability for demanding industrial environments. The wheel is suitable for various cutting, grinding, and polishing tasks, ensuring precision and reliability in manufacturing processes.

Technical Specifications

Dimensional Parameters

Parameter	Description
D	Outer Diameter
D1	Inner Diameter
A	Segment Width
B	Segment Thickness
E	Slot Depth
H	Total Height

Wheel Type

Type 1

Design Features

Segmented Design, Wide Water Slot
