

Industrial Hardware Accessory with Grooved Surface

These precision-engineered cylindrical hardware accessories are suitable for various industrial applications. They are constructed from high-grade metal and feature grooved surfaces for enhanced grip and secure fastening.

Product Overview

Precision Industrial Hardware

These precision-engineered hardware accessories are designed for demanding industrial applications. Featuring a specialized grooved surface, they provide enhanced grip and secure fastening capabilities. Constructed from high-grade metal, these components offer superior durability and resistance to wear and tear, ensuring reliable performance in various project environments.

Technical Specifications

Material Grade

High-Grade Metal • Industrial Durable

Surface Finish

Grooved

Shape

Cylindrical

Suitable Applications

Industrial Assembly, Fastening, General Hardware
