

Industrial Heat Exchanger Unit

This heat exchanger unit combines a heat exchanger, pumps, and other equipment for integrated functionality. It is designed for efficient heat transfer in various industrial applications, including HVAC, process heating, and cooling.

Overview

Industrial Heat Exchanger Unit

This industrial heat exchanger unit is a fully customized, skid-mounted system designed for efficient thermal management. It integrates high-performance plate heat exchangers with circulation pumps, precision piping, valves, and control instrumentation. Engineered for flexibility, the unit is tailored to meet specific customer requirements for HVAC, process heating, and cooling applications.

System Configuration

Key Components

- Plate Heat Exchanger
- Circulation Pumps
- Control Panel
- Steel Mounting Skid
- Piping and Valves
- Instrumentation

Installation Type

Skid-mounted

Applications

Primary Applications

HVAC, Process Heating, Cooling Systems

Technical Features

Design Flexibility

Customizable • Modular
