

Industrial Heavy-Duty Floor Fan

This heavy-duty floor fan is designed for powerful air circulation in large spaces. The fan features a robust metal construction with a sturdy base, three blades enclosed in a protective wire cage, and adjustable tilt for directing airflow.

Overview

High-Performance Industrial Cooling

This industrial heavy-duty floor fan is engineered for powerful air circulation in demanding environments such as warehouses, factories, and workshops. Featuring a robust metal construction and a sturdy base, it ensures stability and long-term durability during operation. The adjustable tilt design allows for precise airflow direction, providing efficient cooling for large-scale industrial spaces.
