

Industrial High Bay LED Fixture

This high bay LED lighting fixture is designed for industrial and commercial applications requiring high-intensity illumination. The LED light source provides energy-efficient and long-lasting performance, suitable for warehouses, factories, and large indoor spaces.

Product Overview

Industrial High Bay LED Lighting Solution

This industrial high-bay LED fixture is engineered for high-intensity illumination in demanding environments such as warehouses, factories, and large indoor spaces. Utilizing advanced phase-change technology, the design achieves heat transmission rates 50 times faster than pure aluminum, ensuring superior thermal management and durability. The integrated heat-sink design maximizes dissipation efficiency while maintaining an elegant, easy-to-install form factor.

Technical Specifications

Thermal Management Technology	Phase Change Technology
Heat Transmission Efficiency	50 x faster

Key Features

Design Highlights

- Integrated heat-transmission and heat-dissipation design
- Non-contact heat resistance
- High utilization of heat sink
- Easy installation

Recommended Applications	Warehouses, Factories, Large Indoor Spaces, Commercial Facilities
