

Industrial High-Velocity Electric Fan

This high-velocity electric fan is designed for industrial and commercial applications. It features a durable metal construction with a powder-coated finish and a powerful motor for optimal airflow and cooling efficiency.

Product Overview

Industrial-Grade Airflow Solution

This high-velocity electric fan is engineered specifically for demanding industrial and commercial environments. Constructed with durable metal and finished with a corrosion-resistant powder coating, it ensures long-term reliability in tough conditions. The unit features a powerful motor for superior cooling efficiency and includes a tiltable head for precise directional airflow control, making it an essential tool for maintaining optimal working temperatures.

Construction & Design

Material & Finish	Metal construction with powder-coated finish
Corrosion Resistance	Yes

Features & Usability

Portability	Sturdy base equipped with wheels
Airflow Control	Tiltable fan head for directional adjustment

Safety

Safety Features	Metal safety grill, Blade protection
