

Industrial Hopper Dryer for Plastics

This industrial hopper dryer is designed for drying plastic materials. It features a cylindrical hopper with a sight glass, a control panel with digital display, and a blower unit for circulating hot air.

Product Overview

Industrial Hopper Dryer for Plastics

This industrial hopper dryer is engineered for efficient moisture removal from plastic materials prior to processing. It features a robust cylindrical design with an integrated sight glass for real-time material level monitoring. Equipped with a digital control panel and a dedicated blower unit, it ensures consistent airflow and temperature regulation for reliable material handling integration.

System Features

Monitoring

Sight Glass Level Monitoring • Digital Display

Key Features

Cylindrical Hopper, Sight Glass, Digital Control Panel, Blower Unit, Integrated Piping

Control & Operation

Control Interface

- Digital display for precise temperature monitoring
- Push-button interface for simplified operation
- Integrated blower for hot air circulation
