

Industrial Ice Block Production Machine

This industrial ice block machine is designed for efficient and large-scale ice production. It creates uniform, rectangular ice blocks suitable for various applications such as food preservation and cooling.

Overview

Industrial Ice Block Production

This industrial ice block machine is engineered for high-volume, reliable ice production suitable for various commercial and industrial cooling applications. Designed for consistency, it produces uniform 5kg ice blocks with an output capacity of 1000kg per 24 hours. The system includes comprehensive safety protections to ensure operational longevity and performance stability.

Performance Metrics

Daily Capacity

1000 kgs/24hrs
Capacity

Ice Block Weight

5 kgs

Operating Conditions

Standard Operating Conditions

Parameter	Value
Initial Water Temp	16°C
Ambient Temp	35°C

Safety & Protection

Safety Systems

High Pressure Protection, Low Pressure Protection, Over-load Protection, Anti-phase Protection, Compressor Over-heated Protection

Installation Requirements

Power Requirements	Yes
Power Stability Note	If the power supply is unstable, a stabilizer is required for operation.
