

Industrial Ice Block Production Machine

This industrial ice block machine is engineered for efficient and reliable ice production. It features durable construction, automated operation, and precise temperature control to ensure consistent ice block formation.

Overview

Industrial Ice Block Production Machine

This industrial ice block maker is designed for high-efficiency, continuous operation in commercial settings. It is engineered to produce consistent 5kg ice blocks with a daily capacity of 1000kg. The system includes comprehensive safety protections to ensure reliability and longevity in demanding environments.

Performance Metrics

Daily Production Capacity

1000 kg/24h
Capacity

Single Ice Block Weight

5 kg

Operating Conditions

Standard Operating Conditions

Parameter	Value	Unit
Initial Water Temperature	16	°C
Ambient Temperature	35	°C

Safety & Electrical

Safety Protections

High Pressure Protection, Low Pressure Protection, Over-load Protection, Anti-phase Protection, Compressor Over-heated Protection

Power Requirements

A voltage stabilizer is required if the power supply is unstable.
