

Industrial Internal Combustion Engine

This robust engine is engineered for a variety of general machinery applications. Its durable cast iron construction ensures longevity in demanding environments.

Product Overview

Robust Industrial Power Solution

This industrial internal combustion engine is engineered for demanding environments where reliability and durability are paramount. Constructed with a cast iron engine block, it offers exceptional longevity for heavy-duty machinery applications. The unit comes fully equipped with essential components including a multi-blade cooling fan, alternator, and integrated fuel filtration system, ensuring seamless operation and efficient performance.

Technical Specifications

Block Material	Cast Iron
Included Components	Multi-blade cooling fan, Alternator, Fuel filter, Hoses and connections

Application

Suitability	Heavy Duty • Industrial Use • Reliable
Primary Application	General industrial machinery
