

Industrial Juice Extractor

This industrial juicer efficiently extracts juice from fruits and vegetables. Its robust stainless-steel construction and automated operation make it suitable for commercial applications.

Overview

Industrial Juice Extraction Solution

This industrial juicer is engineered for high-efficiency extraction from a wide variety of fruits and vegetables. Featuring a continuous-feed hopper system and a precision cylindrical screen, it effectively separates juice from pulp while maintaining high throughput. Its robust stainless-steel construction ensures long-term durability and strict adherence to commercial hygiene standards, making it an ideal asset for food processing plants.

Technical Features

Core Components

- Continuous-feed hopper
- Cylindrical separation screen
- Juice collection system
- Waste collection system
- Heavy-duty motor

Build Material	Stainless Steel
Operation Mode	Automated

Application

Hygiene Compliance

Food Grade • Commercial Ready

Primary Applications	Food Processing, Commercial Juice Production, Large-scale Extraction
