

Industrial Large-Format Processing Machine

This machine is a large-format processing machine designed for industrial applications. It can be used for cutting, engraving, or routing large sheets of material such as wood, plastic, or metal.

Overview

Industrial Large-Format Processing Solution

This industrial-grade processing machine is engineered for high-precision cutting and engraving tasks on large-format materials. Featuring a robust, stationary-ready frame and a specialized grid-slat work surface, it is optimized for consistent performance in demanding industrial environments. The intuitive control interface allows for efficient operation, making it a reliable choice for processing wood, plastic, and metal sheets.

Technical Specifications

Equipment Category

Industrial • Large-Format

Work Surface Design

Grid and slat support system

Mobility

Yes

Compatible Materials

Wood, Plastic, Metal

Control Interface

Integrated control panel with display screen and tactile buttons
