

Industrial Laser Engraving and Etching Machine

This precision laser engraving and etching machine is designed for industrial applications. It offers high accuracy and repeatability for marking various materials.

Overview

Industrial Laser Precision

The GH-8812 Laser Series Etching Machine is a high-performance industrial solution designed for precision marking and engraving. Engineered for reliability, this machine delivers exceptional accuracy and repeatability across a diverse range of materials. With its compact footprint and integrated control interface, it streamlines production workflows while maintaining professional-grade output quality.

Technical Specifications

Model Number	GH-8812
Application Type	Laser Engraving, Laser Etching, Industrial Marking

Features

Key Features

- High-accuracy engraving
- Consistent repeatability
- Integrated control system
- User-friendly interface
- Compact industrial design
