

Industrial Laser Engraving and Etching Machine

This precision laser engraving and etching machine is designed for industrial applications. It features a compact design with integrated computer control, adjustable work platform, and safety enclosure.

Overview

Industrial Precision Engraving

This industrial laser engraving and etching machine is engineered for high-precision marking on a diverse range of materials, including metals, plastics, and ceramics. It features a compact, integrated design complete with an adjustable work platform and a dedicated safety enclosure. Equipped with an extraction system and user-friendly software, this solution is optimized for safe, efficient, and high-resolution industrial applications.

Technical Specifications

Safety Features

Safety Enclosure • Protective Cabinet • Integrated Extraction System

Supported Materials

Metals, Plastics, Ceramics

Control Interface

Integrated computer control with user-friendly software interface

Design & Build

Design Type

Compact industrial design

Work Platform

Yes
