

# Industrial Laser Engraving and Etching Machine

This precision laser engraving and etching machine is designed for industrial applications. It features a high-precision laser head, a stable worktable, and an integrated control system for marking and engraving various materials.

## Overview

### Industrial Precision Laser System

This industrial-grade laser engraving and etching machine is engineered for high-precision marking on a wide variety of materials. Featuring a robust frame for stability, it includes an integrated control system with a dedicated monitor and an advanced chiller unit for optimal temperature regulation. Designed for speed and accuracy, this system provides a reliable solution for demanding industrial engraving and etching applications.

## Key Performance Metrics

### Performance Metrics

**201**

Model Series

**240 V**

Voltage Compatibility

## System Features

### Core Components

- High-precision laser head
- Stable and adjustable worktable
- Integrated control system with monitor
- Dedicated laser chiller unit
- Robust industrial-grade frame

### Application Suitability

Industrial Marking, Laser Engraving, Laser Etching, Material Processing
