

Industrial Laundry Washing Machine

This heavy-duty industrial washing machine is designed for large-scale laundry operations. It features a robust construction with a stainless steel drum and a durable frame.

Overview

Industrial BX Series Washing Machine

The BX series is a robust, horizontal-structure commercial washing machine engineered for high-efficiency, large-scale laundry operations. Constructed with high-quality stainless steel for the drum and frame, this machine ensures durability and reliability in demanding environments. It is an ideal solution for hotels, restaurants, and professional laundry plants requiring consistent performance and low operational noise.
