

Industrial LCD Display with Calibration Indicators

This LCD display features a rectangular screen with calibration or measurement indicators. It connects to a complex mechanism with cables, a control box, and linkages, suggesting precise positioning within equipment.

Overview

Industrial Precision Display

This industrial LCD display is engineered for high-precision environments, featuring integrated calibration markings along the screen for accurate measurement and positioning. The assembly includes a robust mechanical structure with a dedicated control box, making it suitable for complex machinery integration. Designed for durability and performance, this unit supports advanced actuation and monitoring tasks in demanding industrial settings.

Technical Specifications

Display Type	Industrial LCD
Calibration Indicators	Yes

Mechanical Assembly

Included Components

- LCD Display Unit
- Black Control Box
- Mechanical Levers
- Linkage Mechanisms
- Mounting Bracket

Mounting Configuration	Bracket-mounted control system with linkage assembly
------------------------	--

Application

Environment Suitability	Industrial, Precision Machinery, Actuation Systems
-------------------------	--
