

Industrial LCD Screen

This high-resolution LCD screen is designed for industrial applications. It provides clear display of process data, machine status, and user interfaces with a durable construction and wide viewing angle, suitable for use in plastic and rubber machinery.

Product Overview

Industrial-Grade Display Solution

This high-resolution LCD screen is engineered specifically for demanding industrial environments. It features durable construction and a wide viewing angle, ensuring clear visibility of critical process data, machine status, and user interfaces. Designed for seamless integration, it is compatible with various industrial control systems and is particularly well-suited for plastic and rubber machinery applications.

Technical Features

Recommended Applications

- Plastic machinery
- Rubber machinery
- Industrial control systems
