

Industrial LED Beacon Light

This high-visibility beacon light features multiple LEDs for enhanced brightness. Designed for industrial and automotive applications, it provides a reliable warning signal.

Overview

Industrial Warning Signal Solution

This Industrial LED Beacon Light is designed for high-visibility warning applications in demanding environments. Featuring 21 high-intensity LEDs and a weather-resistant construction, it provides reliable performance for both industrial and automotive needs. The integrated bolt-mount base ensures a secure installation for long-term safety signaling.

Technical Specifications

Operating Voltage

12 V

Min Voltage

48 V

Max Voltage

LED Quantity

21 pcs

Design & Build

Lens Color

Orange

Base Color

Black

Mounting Method

Bolt-mount integrated base

Protection Features

Weather-resistant, Durable Construction, High-visibility

Applications

Recommended Use

- Industrial facilities
- Automotive warning signals
- Outdoor environments
- Safety-critical areas
