

Industrial LED High Bay Light

This high-performance LED high bay light provides efficient and uniform illumination. Its durable construction and robust heat sink ensure long-lasting performance and significant energy savings.

Product Overview

Industrial LED High Bay Solution

This industrial LED high bay light is engineered for high-performance illumination in demanding commercial and industrial environments such as warehouses, factories, and gymnasiums. It features advanced phase-change thermal management technology, which facilitates heat transmission 50 times faster than pure aluminum. The integrated design ensures optimal heat dissipation and long-lasting durability, offering a reliable and energy-efficient lighting solution that is both elegant and easy to install.

Technical Features

Design Advantages

- Integrated heat transmission and dissipation
- Non-contact heat resistance
- High utilization of heat sink
- Elegant, easy-to-install design

Thermal Management Technology

Phase Change Technology (50x faster heat transmission than pure aluminum)

Applications

Recommended Applications

Warehouses, Factories, Gymnasiums, Large Indoor Spaces
