Product Overview

Industrial Lever Chain Hoist

This industrial lever chain hoist is engineered for demanding lifting applications, featuring a compact, low-headroom design that allows for versatile usage in confined spaces. Built with high-precision CNC gears and a durable, impact-resistant gear cover, it ensures consistent performance and longevity. The system incorporates a double pawl brake and a safety clutch hand wheel, providing reliable load control and operator security in professional environments.

Technical Specifications

Working Load Limit (WLL)

1.5 t

Rated Capacity

Standards & Compliance

EN 13157, AS/NZS 1418.2

Endurance Testing

Exceeds 1500 cycles

Design & Construction

Core Features

- Compact design with low headroom
- Short lever handle for light operation force
- High precision CNC gears
- Impact-resistant gear cover
- DOCROMET treated important parts
- High precision caged roller bearings

Safety Systems

Safety Features

Double Pawl Brake System • Fused Brake Disc • Safety Clutch Hand Wheel
