

Industrial Lifting Hook

These heavy-duty lifting hooks are suitable for industrial applications. Forged from high-strength alloy steel, they offer maximum durability and reliability.

Product Overview

Industrial Lifting Hook

These heavy-duty lifting hooks are engineered for demanding industrial environments, providing exceptional reliability for critical rigging tasks. Forged from high-strength alloy steel, they are built to withstand significant loads while maintaining structural integrity. Designed for versatility, they are compatible with a wide range of cranes, hoists, and rigging systems, ensuring secure operation with integrated safety latches.

Technical Specifications

Configurations

- Eye Hooks
- Clevis Hooks

Material	High-strength alloy steel
Manufacturing	Forged
Safety Features	Safety Latch, High-Strength

Applications

Compatible Systems

Cranes • Hoists • Rigging Systems
