Product Overview

Industrial Liquid Homogenizer Mixer

This industrial-grade homogenizer mixer is engineered for the efficient processing of liquid products, including detergents, shampoos, shower gels, sanitizing gels, and liquid soaps. It integrates essential functions such as mixing, homogenizing, heating, cooling, and pumping, providing a comprehensive solution for liquid production lines. Designed for durability and performance, this equipment is an ideal choice for domestic and international manufacturing facilities requiring consistent and uniform liquid blending.

Key Features

Integrated Functions

- Mixing
- Homogenizing
- Heating
- Cooling
- Pump distance finished products
- Defoaming (optional)

Certifications

CE • ISO • GMC

Construction

Material Construction	High-grade stainless steel
Design Features	Vertically mounted tank, Electric motor agitator, Support structure, Access stairs, Safety railings, Control panel

Applications

Suitable Applications

Industry	Product Type
Personal Care	Shampoo, Shower Gel, Liquid Soap
Home Care	Detergent, Dishwashing Liquid, Softener
Hygiene	Sanitizing Gel, Antibacterial Gel, Disinfectant
