

Industrial Lockstitch Sewing Machine

This lockstitch sewing machine is engineered for high-performance stitching on various fabrics. An integrated lubrication system minimizes wear, extending the machine's lifespan.

Overview

Industrial Performance

This industrial lockstitch sewing machine is engineered for high-performance stitching across a variety of fabrics. Its robust construction ensures durability and stability during operation, while precision components deliver consistent stitch quality for professional results. Designed with an integrated lubrication system to minimize wear and tear, this machine is an ideal solution for apparel manufacturing and textile production environments.

Technical Specifications

Lubrication

Integrated Lubrication

Stitch Type

Lockstitch

Features

Adjustable Settings

- Adjustable stitch length
- Adjustable tension settings

Applications

Recommended Industries

Apparel Manufacturing, Textile Production, Industrial Sewing
