

# Industrial Machine Roller Dolly

Industrial machine roller dollies facilitate the movement of heavy machinery. Individual dollies can be mixed and matched to accommodate various load shapes.

## Overview

### Industrial Load Moving Solution

These industrial machine roller dollies are engineered for the safe and efficient transport of heavy-duty loads ranging from 3 to 1000 tons. Designed for long-term reliability and durability, they are suitable for warehouse, storage, and complex cargo handling operations. The modular design allows units to be mixed and matched to accommodate oddly shaped loads with precision.

## Technical Specifications

### Load Capacity Range

<b>3 tons</b> Minimum Capacity	<b>1000 tons</b> Maximum Capacity
-----------------------------------	--------------------------------------

<b>Service Life</b>	10+ years
<b>Usage Configuration</b>	Standalone, Combined/Modular

## Applications

### Primary Applications

- Warehouse operations
- Storage handling
- Heavy machinery transport
- Complex cargo movement

## Compliance & Market

### Global Market Presence

Middle East • America • Africa • Europe
