

Industrial Machinery Cylinder

This high-quality cylinder is designed for use in machinery and industrial applications. Its robust construction includes cooling fins for efficient heat dissipation.

Product Overview

High-Performance Industrial Cylinder

This industrial machinery cylinder is precision-engineered for demanding applications, specifically compatible with TL43, BG430, and CG430 brush cutter systems. Designed with a focus on efficiency, it delivers high power output while maintaining low fuel consumption rates. Its advanced design also ensures reduced emissions, making it a reliable and environmentally conscious choice for professional equipment maintenance.

Technical Specifications

Key Performance Attributes

High Power • Low Fuel Consumption • Low Emission

Compatible Models

TL43, BG430, CG430

Design & Construction

Design Highlights

- Robust construction for industrial durability
- Integrated cooling fins for heat dissipation
- Precision-engineered for optimal longevity
