

Industrial Mould

This precision-engineered mould is designed for industrial applications. Its durable construction features multiple adjustment points for precise calibration, making it suitable for high-volume production with exceptional accuracy and repeatability.

Overview

Precision Industrial Moulding Solution

This precision-engineered industrial mould is designed for high-volume production environments requiring exceptional accuracy and repeatability. Built with robust, high-quality materials, it offers superior resistance to wear and tear, ensuring long-term operational longevity. Its compact design facilitates seamless integration into existing machinery setups, while multiple adjustment points allow for precise calibration during operation.

Technical Specifications

Output Force

20 kN

Output Force

Air Pressure Range	0.5 - 0.7 MPa
Applicable Wire Range	0.5 - 6.0 mm ²
Weight	4.5 kg

Physical Dimensions

Dimensions

Dimension	Value
Length	200 mm
Width	150 mm
Height	100 mm

Features

Key Features

- High-volume production capability
- Precision calibration adjustment points
- Compact design for easy integration
- Wear-resistant construction

Compliance	ISO 9001, Industrial Grade
------------	----------------------------
