

Industrial Multi-Media Video PC

This industrial multi-media video PC is designed for robust performance in demanding environments. It features a rugged enclosure with passive cooling for reliable operation and connectivity options including multiple USB, Ethernet, serial, and video outputs.

Product Overview

Industrial Multi-Media Video PC

This industrial low-power multi-media video PC is engineered for robust performance in demanding environments. Featuring a rugged enclosure and passive cooling, it ensures reliable operation across a wide temperature range. It is an ideal solution for industrial automation, digital signage, and video surveillance applications.

Technical Specifications

Connectivity

- Multiple USB ports
- Ethernet ports
- Serial ports

Typical Applications

Industrial Automation • Digital Signage • Video Surveillance

Cooling Method

Passive cooling

Video Outputs

VGA, DVI
