

Industrial Network Router

This network router is designed for industrial and commercial use. It features multiple Ethernet ports and indicator LEDs for monitoring network activity and device status.

Overview

Industrial-Grade Connectivity

This industrial network router is engineered to provide reliable and robust connectivity in challenging environments. Designed with a durable enclosure, it ensures consistent network performance and device monitoring through integrated indicator LEDs. It is an ideal solution for commercial and industrial applications requiring stable Ethernet connectivity.

Technical Specifications

Model Number	EH2000-04
Device Type	Industrial Network Router
Connectivity	Ethernet, Wired

Features

Monitoring

- Integrated indicator LEDs
- Real-time network activity status
- Device health monitoring
