

Industrial Oil Press Machine

This industrial preliminary press machine is designed for extracting oil from various seeds and nuts. It features a robust construction with a large cylindrical pressing chamber, a heavy-duty frame, and a powerful motor.

Product Overview

Industrial Preliminary Oil Press

This industrial-grade preliminary press is engineered specifically for the efficient extraction of oil from a diverse range of seeds and nuts. Built with a robust frame and a heavy-duty motor, the machine ensures stability and longevity during high-volume, large-scale oil production operations. Operators benefit from integrated pressure gauges and safety mechanisms designed to maintain precise control throughout the extraction process.

Technical Specifications

Safety Systems

- Integrated pressure monitoring
- Advanced safety mechanisms
- Pressure gauges for process control

Construction Quality

Heavy-duty frame, Industrial grade, Large pressing chamber

Application

Production Suitability

Large-scale production • Oil extraction • Seeds and nuts
