

Industrial Overlock Sewing Machine for Apparel and Footwear

This industrial overlock sewing machine is designed for garment, shoe, and accessory manufacturing. It features adjustable stitch length and width settings for versatile sewing applications.

Product Overview

Industrial Overlock Sewing Machine

This industrial overlock sewing machine is engineered for high-performance manufacturing of garments, footwear, and accessories. Featuring a robust motor designed for continuous factory use, it provides reliable high-speed operation for demanding production environments. Its versatile design includes adjustable stitch length and width settings, making it an essential tool for precise edging, seaming, and hemming across a variety of fabric types.
