

Industrial Overlock Sewing Machine for Garments and Shoes

This industrial overlock sewing machine is engineered for high-speed and precise stitching, ideal for various fabric types. Its robust construction ensures durability and features adjustable settings for customized seam finishes.

Overview

Industrial Overlock Sewing Machine

This industrial overlock sewing machine is expertly engineered for high-speed, precise stitching across a wide range of garment, shoe, and accessory manufacturing applications. Built for demanding industrial environments, its robust construction ensures long-term durability and consistent production output. The machine features highly adjustable settings for stitch length, width, and differential feed, providing operators with the flexibility needed for customized, professional-grade seam finishes.

Technical Specifications

Adjustable Settings

- Stitch length
- Stitch width
- Differential feed

Suitable For

Garment Manufacturing, Shoe Production, Accessory Manufacturing

Operational Features

Design Highlights

High-Speed Operation • Ergonomic Design • User-Friendly Interface • Robust Construction
