

Industrial Overlock Sewing Machine for Textile Manufacturing

This industrial overlock sewing machine is designed for high-speed operation in textile manufacturing. It utilizes multiple thread spools to create complex, durable stitches on a variety of fabrics.

Product Overview

Industrial High-Speed Overlock Machine

This professional-grade industrial overlock sewing machine is engineered specifically for high-speed textile manufacturing environments. It features a robust, heavy-duty metal frame ensuring long-term durability and stability during intensive production cycles. With its multi-thread configuration and precision needle mechanism, it delivers consistent and secure seams across a variety of fabric types.

Technical Specifications

Frame Material	Robust Metal
Primary Application	Textile Manufacturing, Industrial Overlocking, High-Speed Stitching

Performance Features

Key Capabilities

- High-speed operation for mass production
- Multi-thread spool support for complex stitching
- Precision needle control
- Heavy-duty construction

Seam Integrity

Strong Seams • Secure Stitching • Accurate Handling
