

Industrial Ozone Air Sterilizer

This is an ozone generator used for space disinfection. The unit has a control panel, fan, ventilation slots, and wheels for mobility.

Product Overview

Industrial Ozone Air Sterilizer

This industrial-grade ozone generator is specifically engineered for high-efficiency space disinfection. Built for professional environments, it incorporates an integrated fan system to ensure thorough air circulation and wide-area coverage. Designed for mobility and ease of use, the unit is mounted on wheels and features a tactile control panel for precision operation in commercial and industrial settings.

Technical Features

Control System

- Manual control knobs
- Operational status indicators
- Integrated ventilation slots

Key Features

Industrial Grade, Space Disinfection, Mobile Design, Air Circulation Fan

Operational Details

Mobility

Wheeled unit for industrial portability
