

Industrial Pedestal Fan with Metallic Blades

This industrial-grade pedestal fan is designed for powerful air circulation in demanding environments. The durable metallic blades deliver high-velocity airflow for effective cooling in warehouses, workshops, and factories.

Overview

Industrial-Grade Air Circulation

The CIF-45AP is a robust industrial-grade pedestal fan engineered for high-velocity air circulation in demanding environments. Designed with durable metallic blades, it provides consistent and effective cooling for large spaces such as warehouses, workshops, and factories. Its adjustable height and tilt mechanism allow for precise airflow control, ensuring optimal comfort and ventilation where it is needed most.

Key Features

Core Capabilities

Industrial Grade, High-Velocity Airflow, Adjustable Height, Tilt Mechanism, Metallic Blades

Design & Build

Construction Materials

- Metallic fan blades
- Sturdy tripod base
- Protective safety grill

Safety Features

Protective Grill • Stable Tripod Base

Applications

Recommended Use Cases

- Warehouses
- Workshops
- Factories
- Large commercial spaces
