

Industrial Permanent Magnet Motor

This high-performance permanent magnet motor is designed for industrial applications. It features a finned housing for efficient heat dissipation and offers high torque density.

Product Overview

Industrial Permanent Magnet Motor

This high-performance permanent magnet motor is engineered specifically for demanding industrial applications. It features a robust, finned housing design that ensures efficient heat dissipation and supports reliable, continuous operation. With high torque density and superior energy efficiency, this motor provides precise speed control and consistent performance for a wide range of industrial tasks.

Design & Construction

Installation Features

- Integrated lifting lugs
- Stable mounting base
- Durable shaft construction

Housing Design

Finned Housing, Efficient Heat Dissipation, Corrosion Resistant Coating

Performance Metrics

Performance Highlights

1 Continuous

Operational Mode

1 High Density

Torque Efficiency

Electrical & Control

Electrical Interface

- Terminal box for easy connection
- Square control box with handle
