

Industrial Pipe Fittings Assortment

These pipe fittings are designed for pressure piping systems. The assortment includes elbows, bends, tees, crosses, and reducers in various materials like carbon steel, alloy steel, and stainless steel.

Overview

Industrial Pipe Fittings Assortment

This comprehensive assortment of industrial pipe fittings is engineered for demanding high-pressure piping applications. Designed for versatility, the collection includes various configurations such as elbows, tees, crosses, and reducers, suitable for use in shipbuilding and heavy industrial equipment. These components are manufactured to meet a wide array of international standards, ensuring compatibility and reliability in complex piping systems.

Technical Specifications

Elbow Configurations

90° LR • 45° LR • 90° SR • R/3D

Available Fitting Types

Butt-welding, Socket-welding, Thread fittings, Special fittings, Flanges

Material Options

Carbon Steel, Alloy Steel, Stainless Steel

Standards & Compliance

Supported Standards

- GB
- DL
- HG
- SH
- SY
- ASME
- MSS
- DIN
- EN
