

Industrial Piston Air Compressor

This industrial air compressor is engineered for heavy-duty use. It features a high-capacity air tank and integrated filtration for optimal air quality.

Overview

Industrial-Grade Reliability

This industrial piston air compressor is engineered for heavy-duty applications requiring consistent and reliable performance. It features a robust motor paired with a high-capacity air tank and an efficient cooling system to ensure a long service life. With integrated filtration and precise pressure regulation, this unit delivers optimal air quality and control for a wide range of pneumatic tools and equipment.

Key Features

Performance Highlights

1 Class
Industrial Grade

100 %
Duty Cycle

Core Components

- Robust heavy-duty motor
- High-capacity air storage tank
- Integrated cooling system
- Built-in air filtration
- Precision pressure regulation
