

Industrial Plastic Storage Containers for Textile Machinery

Durable plastic containers designed for industrial use, suitable for storing liquids or chemicals used in textile machinery. Available in multiple sizes, these containers are constructed from robust plastic material for longevity and feature a secure cap to prevent leaks and spills.

Product Overview

Industrial-Grade Storage Solutions

These durable plastic containers are specifically engineered for the rigorous demands of textile manufacturing environments. Designed to safely house essential process liquids such as dyes and solvents, the containers feature robust construction that resists chemical degradation. Each unit is equipped with a secure, leak-proof cap system to maintain facility safety and prevent hazardous spills during handling or storage.

Physical Properties

Material Composition	High-Density Industrial Plastic
Closure Type	Secure Leak-Proof Cap

Application Suitability

Industry Compliance

Textile Machinery • Chemical Storage • Manufacturing

Compatible Substances	Industrial Dyes, Solvents, Processing Chemicals, Textile Liquids
-----------------------	--

Logistics

Available Variants

- Multiple sizes available
- Variable storage capacities
