

Industrial Plate Making and Printing Machine with Laser Cutting

This plate making and printing machine is designed for industrial applications. It features a large format work area with sliding platform and an enclosed laser cutting system.

Product Overview

Industrial Precision System

This industrial-grade plate making and printing machine is engineered for high-precision manufacturing environments. It features a versatile large-format work area with a sliding platform, allowing for seamless material handling and efficient workflow. Equipped with an integrated laser cutting system and enclosed protective housing, it ensures both operational safety and consistent accuracy for demanding industrial printing and cutting tasks.

Technical Specifications

Primary Application	Industrial Printing and Plate Making
Key Features	Laser Cutting, Sliding Platform, Large Format, Enclosed System

Design and Build

Mobility and Stability

- Heavy-duty frame
- Caster wheels for mobility
- Adjustable support legs for stability

Safety Equipment

Enclosed Laser System • Transparent Protective Windows
