

Industrial Polishing Machine

This machine is designed for industrial polishing applications, including nail and jewelry work, wood engraving, and circuit board drilling. It features variable speed control and a foot pedal for hands-free operation.

Overview

Professional Precision Polishing

This industrial polishing machine is engineered for high-precision finishing tasks across a wide variety of materials. It features a robust motor design paired with variable speed control to ensure consistent performance during demanding applications. With included accessories like a foot pedal for hands-free operation and a secure collet chuck handpiece, it provides both efficiency and control for professional environments.

Applications

Primary Applications

Nail Care, Wood Engraving, Craft Carving, Denture Polishing, Artificial Limb Polishing, Jewelry Engraving, Mould Polishing, Precision Parts Carving, Circuit Board Drilling

Technical Features

Control Features

- Variable speed control
- Hands-free foot pedal operation
- Secure collet chuck handpiece

Build Quality

Robust Motor • Durable Housing • High-Precision Design
