

# Industrial Polishing Machine with Variable Speed Control

This high-precision industrial polishing machine is designed for demanding applications. It features variable speed control, multiple handpieces, and a foot pedal for hands-free operation.

## Overview

### Industrial Polishing Machine

This high-precision industrial polishing machine is engineered for demanding applications requiring superior surface finishes. It features a variable speed control unit that allows for exceptional accuracy across various materials, including metal, plastic, and composites. Designed for professional efficiency, the system includes multiple handpieces for diverse tasks and a foot pedal for convenient, hands-free operation.

## Technical Specifications

### Control Features

- Variable speed control unit
- Foot pedal operation

### Included Accessories

- Multiple handpieces
- Carrying case

### Operation Type

Hands-free • Variable Speed

### Compatible Materials

Metal, Plastic, Composite
